SUMMARY

Computer Science graduate specializing in AI & ML with hands-on experience in Python, machine learning, data pre-processing, feature engineering, model training, model evaluation, model deployment, and REST API development. Experienced in developing ML solutions for customer churn, spam detection, cardiovascular risk prediction, and computer vision applications. Familiar with LLM fundamentals, prompt engineering, RAG concepts, NLP, and AI model integration, with a strong foundation in software development and problem solving.

TECHNICAL SKILLS

Languages: Python, Java, SQL, HTML, CSS

Machine Learning: Scikit-learn, XGBoost, CatBoost, TensorFlow (Basic), PyTorch (Basic), Neural Networks, Feature Engineering, Feature Selection, Model Training, Model Evaluation, Model Deployment

Generative AI & NLP: LLM Fundamentals, Prompt Engineering, RAG Fundamentals, NLP, AI Model Integration

Computer Vision: OpenCV, Image Processing, Image Classification, Image Preprocessing, Data Augmentation, Feature Extraction

Data: Pandas, NumPy, Data Preprocessing, Data Cleaning, EDA, Statistical Analysis, Data Visualization, Data Pipelines

AI Engineering: Flask, REST APIs, API Development, Model Inference, Debugging

Software Engineering: OOP, DSA, Algorithms, DBMS, Operating Systems, Computer Networks, SDLC, Agile Development, Software Design, Problem Solving

Tools: Git, GitHub, GitHub Actions (CI/CD), n8n, Streamlit, MS Excel, Power BI, VS Code, Jupyter Notebook

Soft Skills: Problem Solving, Communication, Team Collaboration, Adaptability, Time Management

EDUCATION

B.Tech – Computer Science & Engineering (AI & ML)

2022 – 2026

Institute of Aeronautical Engineering, Hyderabad

CGPA: 8.18

EXPERIENCE

AI & ML Intern – Aenexz Tech Private Limited

Mar 2026 – Jun 2026

- Developed a telecom customer churn prediction solution using machine learning and customer usage data.
- Performed data preprocessing, exploratory data analysis, feature engineering, and feature selection for model training.
- Trained and evaluated Logistic Regression, Decision Tree, Random Forest, SVM, and KNN models using Accuracy and ROC-AUC.
- Applied RFE, SHAP, and Partial Dependence Plots for feature analysis and model interpretability, while comparing model performance and generating churn probabilities to support customer retention.

BCG X – GenAI Job Simulation (Virtual Experience)

Feb 2026 – Mar 2026

- Performed data extraction and initial analysis as part of a GenAI-focused financial technology simulation.
- Developed an AI-powered financial chatbot based on assigned business requirements.
- Applied data analysis and generative AI concepts to solve practical tasks in a simulated work environment.

Machine Learning Intern – Edunet Foundation

Nov 2024 – Dec 2024

- Built an email spam detection application using Python, Flask, and supervised machine learning, achieving 95% classification accuracy.
- Performed data preprocessing, feature engineering, model training, testing, debugging, and evaluation.
- Used Git and GitHub for version control and collaborated with team members to deliver project milestones.

PROJECTS

Cardiovascular Risk Prediction System

May 2025 – Jul 2025

Python, XGBoost, CatBoost, SVM, Flask, Pandas, REST APIs

- Developed an ML application for cardiovascular risk prediction using ensemble methods and structured data.
- Performed data cleaning, feature engineering, model selection, and evaluation to improve predictive reliability.
- Built Flask REST APIs for real-time model inference and validated model outputs using evaluation metrics.

Glaucoma Detection System

Aug 2025 – Oct 2025

Python, OpenCV, Scikit-learn, Flask, Machine Learning

- Developed an AI-based glaucoma detection system using retinal image preprocessing and machine learning techniques.
- Applied OpenCV for image preprocessing and feature extraction to prepare retinal images for model training.
- Trained and evaluated machine learning models for glaucoma classification and analyzed prediction performance.
- Developed a Flask-based application providing real-time glaucoma prediction through a REST API.

CERTIFICATIONS

Java 11 – Infosys Springboard

Machine Learning – Simplilearn

Python Essentials – Cisco

AI Tools and ChatGPT Workshop – Be10x

ACHIEVEMENTS

Solved 500+ coding problems across LeetCode, GeeksforGeeks, and CodeChef.

Secured 2nd place in a hackathon through collaborative software development and problem-solving.
